In his book *Storm Over the Constitution*, Harry Jaffa argues that the Constitution is not a neutral document, but rather a reflection of the Founders' understanding of natural law and the principles of Free Downloaded liberty. Jaffa shows how the Constitution has been under attack from both the left and the right, and he argues that we must return to the Founders' principles if we want to preserve our constitutional Free Download.

The Founders' Understanding of Natural Law

The Founders of the United States were deeply influenced by the philosophy of natural law. Natural law is the idea that there are certain rights and duties that are inherent in human nature, and that these rights and duties are not dependent on the laws of any particular government. The Founders believed that the Constitution should be based on these natural law principles, and they sought to create a government that would protect the rights of all citizens.

One of the most important natural law principles is the principle of individual liberty. The Founders believed that each individual has the right to life, liberty, and property, and that these rights cannot be taken away by the government without due process of law. They also believed that the government should be limited in its powers, and that it should only exercise those powers that are necessary to protect the rights of citizens.

The Attacks on the Constitution

The Constitution has been under attack from both the left and the right since its inception. On the left, some have argued that the Constitution is too restrictive, and that it does not provide enough protection for the rights of minorities and the poor. On the right, some have argued that the Constitution is too permissive, and that it allows the government to interfere too much in the lives of citizens.

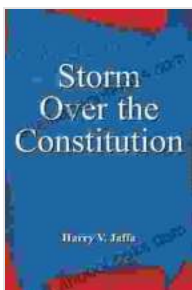

Both of these attacks are misguided. The Constitution is not a perfect document, but it is a sound and workable framework for a free and prosperous society. The Founders recognized that the Constitution would need to be amended over time, and they provided a process for doing so. However, they also recognized that the Constitution should not be changed

lightly, and that it should only be amended when there is a clear need for change.

The Need to Return to the Founders' Principles

If we want to preserve our constitutional Free Download, we must return to the Founders' principles. We must reaffirm our commitment to the principles of natural law and Free Downloaded liberty. We must also be willing to defend the Constitution against all who would seek to undermine it.

Storm Over the Constitution is a timely and important book. It is a book that will help us to understand the Constitution and its importance to our nation. It is also a book that will inspire us to defend the Constitution and to preserve our constitutional Free Download.
