Statism, a political philosophy that advocates for extensive government control over the economy and social life, has gained widespread appeal in recent years. However, beneath its seemingly benevolent facade lies a dark undercurrent of envy that poisons the hearts of both individuals and nations.

Envy is a corrosive emotion that arises from a sense of inadequacy or lack. It breeds resentment, bitterness, and a desire to strip others of what they have. Statism exploits this deep-seated human frailty, promising to alleviate envy by redistributing wealth and power from the "haves" to the "have-nots."

Theological Roots of Statism

The Politics of Envy argues that statism has deep theological roots. By appealing to a sense of victimhood and social justice, statist ideologies cloak themselves in a mantle of moral righteousness. They portray the state as a benevolent protector of the oppressed, justifying its expansion into every aspect of human life.

However, this theological justification is a dangerous illusion. As Dr. Jensen demonstrates, statism is not a force for good but rather a manifestation of the same destructive forces that have plagued humanity throughout history.

The Destructive Consequences of Envy

Envious societies are characterized by a breakdown of trust, cooperation, and individual liberty. People become suspicious of their neighbors, fearing that they may be trying to take advantage of them. This atmosphere of distrust stifles innovation, creativity, and economic growth.

Statism exacerbates these destructive tendencies by creating a culture of dependency. When people are taught that they are entitled to the fruits of others' labor, they lose the incentive to work and strive for a better life. The result is a society that is stagnant, resentful, and ultimately doomed to failure.

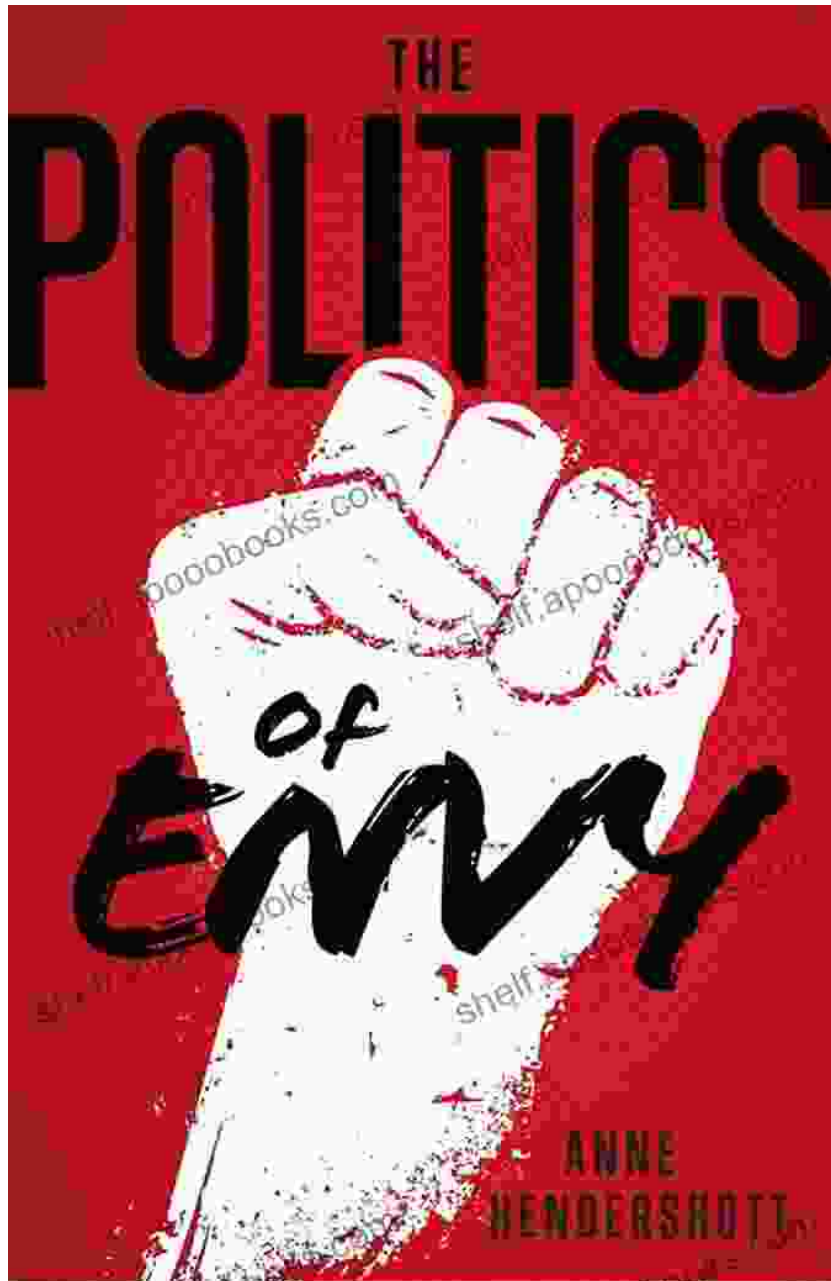

A Call to Resist Statism

The Politics of Envy is a powerful indictment of statism and a clarion call to resist its insidious influence. Dr. Jensen offers a roadmap for a society based on freedom, individual responsibility, and limited government.

He argues that we must reject the politics of envy and embrace a culture of gratitude, personal excellence, and voluntary cooperation. Only by embracing these principles can we build a society that is truly just, prosperous, and free.

A Must-Read for Anyone Concerned About the Future of Society

The Politics of Envy is an essential read for anyone concerned about the direction of our societies. It is a timely and thought-provoking work that sheds light on the dark forces that are undermining our liberties and threatening our future. Dr. Jensen's insights are invaluable for understanding the complexities of statism and for charting a course towards a better world.
