Technology has emerged as a powerful tool to support children with autism and their families. There are now a wide range of apps available that can help children with autism develop important skills, learn new concepts, and communicate more effectively.

To help you find the best apps for your child, we've compiled a list of the top 60 recommended apps for autism. These apps are organized into categories based on the skills they target.

Communication Apps

Communication apps can help children with autism express themselves and connect with others. These apps can use speech, pictures, or text to communicate.

- **Proloquo2Go** is a comprehensive communication app that uses symbols and text to communicate. It is a popular choice for children with autism who are nonverbal or have difficulty speaking.
- **Avaz AAC** is another popular communication app that uses symbols and text to communicate. It is known for its user-friendly interface and its ability to customize the communication boards.
- **TouchChat** is a communication app that uses text to communicate. It is a good choice for children with autism who are able to read and write.
- **LAMP Words for Life** is a communication app that uses pictures to communicate. It is a good choice for children with autism who are not able to read or write.
- **Speak for Yourself** is a communication app that uses a combination of symbols, text, and speech to communicate. It is a good choice for children with autism who have a range of communication needs.

Social Skills Apps

Social skills apps can help children with autism learn how to interact with others in a positive and appropriate way. These apps can teach children about social cues, body language, and conversation skills.

- **Autism & Social Skills** is an app that teaches children with autism about social skills in a fun and engaging way. It includes interactive games and activities that teach children about social cues, body language, and conversation skills.
- **Social Skills for Kids** is an app that teaches children with autism about social skills through videos, games, and activities. It covers a wide range of topics, including making friends, understanding emotions, and resolving conflicts.
- **Play & Learn Social Skills** is an app that teaches children with autism about social skills through play-based activities. It includes games that teach children about turn-taking, sharing, and cooperating.
- **SUPERflex Social Skills** is an app that teaches children with autism about social skills through videos and interactive games. It covers a wide range of topics, including making friends, understanding emotions, and resolving conflicts.
- **Social Thinking** is an app that teaches children with autism about social thinking. It includes videos, activities, and games that teach children about social cues, perspective-taking, and problem-solving.

Learning Apps

Learning apps can help children with autism learn a variety of academic and life skills. These apps can teach children about math, reading, writing, science, and more.

- **Khan Academy Kids** is a learning app that teaches children math, reading, writing, science, and more. It is a comprehensive app that is suitable for children of all ages.
- **ABCmouse** is a learning app that teaches children math, reading, writing, science, and more. It is a popular choice for children ages 2-8.
- **PBS Kids Games** is a learning app that teaches children math, reading, writing, science, and more. It features games based on popular PBS Kids shows.
- **Starfall** is a learning app that teaches children math, reading, writing, and science. It is a popular choice for children ages 3-7.
- **IXL** is a learning app that teaches children math, reading, writing, science, and more. It is a comprehensive app that is suitable for children of all ages.

Behavior Management Apps

Behavior management apps can help children with autism manage their behavior and learn positive coping mechanisms. These apps can track behavior, provide rewards, and offer strategies for managing challenging behaviors.

- **Behavior Tracker** is a behavior management app that helps children with autism track their behavior and earn rewards. It is a simple and easy-to-use app that can be customized to meet the needs of each child.
- **My Behavior Chart** is a behavior management app that helps children with autism track their behavior and earn rewards. It features a variety

of charts and graphs that make it easy to visualize progress.

- **Token Tracker** is a behavior management app that helps children with autism track their behavior and earn rewards. It is a simple and effective app that can be used to reward positive behaviors and reduce challenging behaviors.
- **ABA Studio** is a behavior management app that helps children with autism learn new skills and manage challenging behaviors. It includes a variety of tools and resources that can be used to create individualized behavior plans.
- **BehaviorSnap** is a behavior management app that helps children with autism track their behavior and earn rewards. It features a variety of tools and resources that can be used to create individualized behavior plans.

Other Helpful Apps

In addition to the apps listed above, there are a number of other helpful apps that can support children with autism and their families.

- **Autism Speaks** is an app that provides information and resources on autism. It includes a directory of autism services, a calendar of events, and a forum for parents and caregivers.
- **The Autism Society** is an app that provides information and resources on autism. It includes a directory of autism services, a calendar of events, and a forum for parents and caregivers.
